

Voltaware Limited e LEDCOM International in partnership per risparmio energetico di comuni e famiglie

8 maggio 2018

LEDCOM aggiunge ai propri driver LED ultra efficienti e con controlli wireless integrati anche le soluzioni del partner londinese Voltaware Ltd (www.voltaware.com), mirate al controllo e gestione dei consumi energetici domestici ed industriali.

Nella propria offerta ai comuni per l'illuminazione pubblica o a clienti industriali per l'illuminazione degli interni, Ledcom offrirà anche un sistema non invasivo e di grande efficacia per il monitoraggio dei consumi elettrici delle unità residenziali o industriali.

La pluripremiata Voltaware è una società avanzata sia nello sviluppo elettronico che nella gestione dei dati, attraverso proprietari algoritmi di intelligenza artificiale. La tecnologia della società londinese per il risparmio energetico consente l'installazione senza difficoltà, tramite piccoli magneti, di un dispositivo minuscolo in grado di rilevare i consumi dei singoli apparati e/o macchinari, riportandone le prestazioni su una *app* leggibile dallo smart phone.

Your Carbon footprint

230
KgCO₂

It will take 126.8 trees to absorb that amount of CO₂ in a month

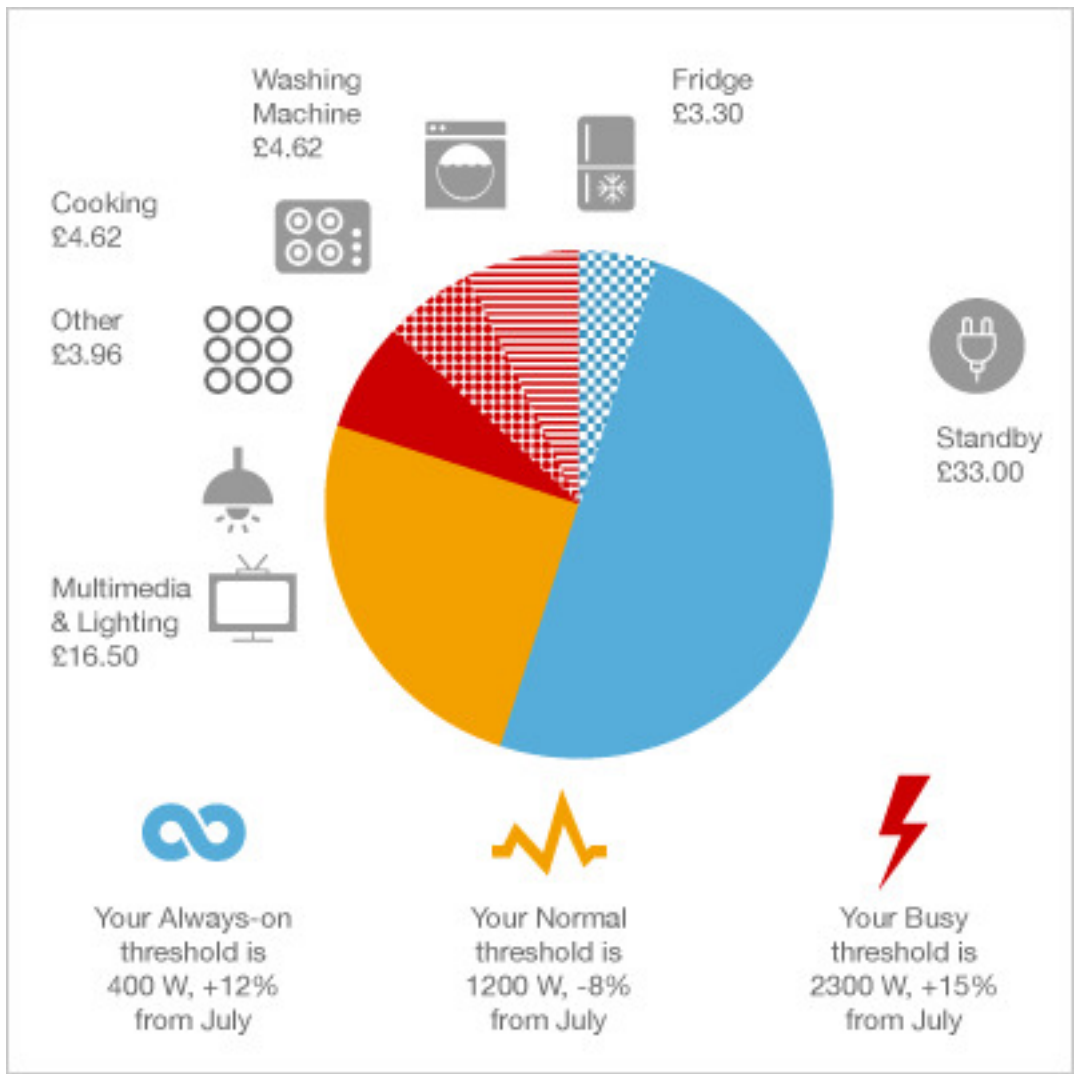

Energy saving

Lower your Always-on by stopping standby power waste. Unplugging computers, stereos, TVs, DVRs, and game-consoles will reduce your electricity bill by 10%.

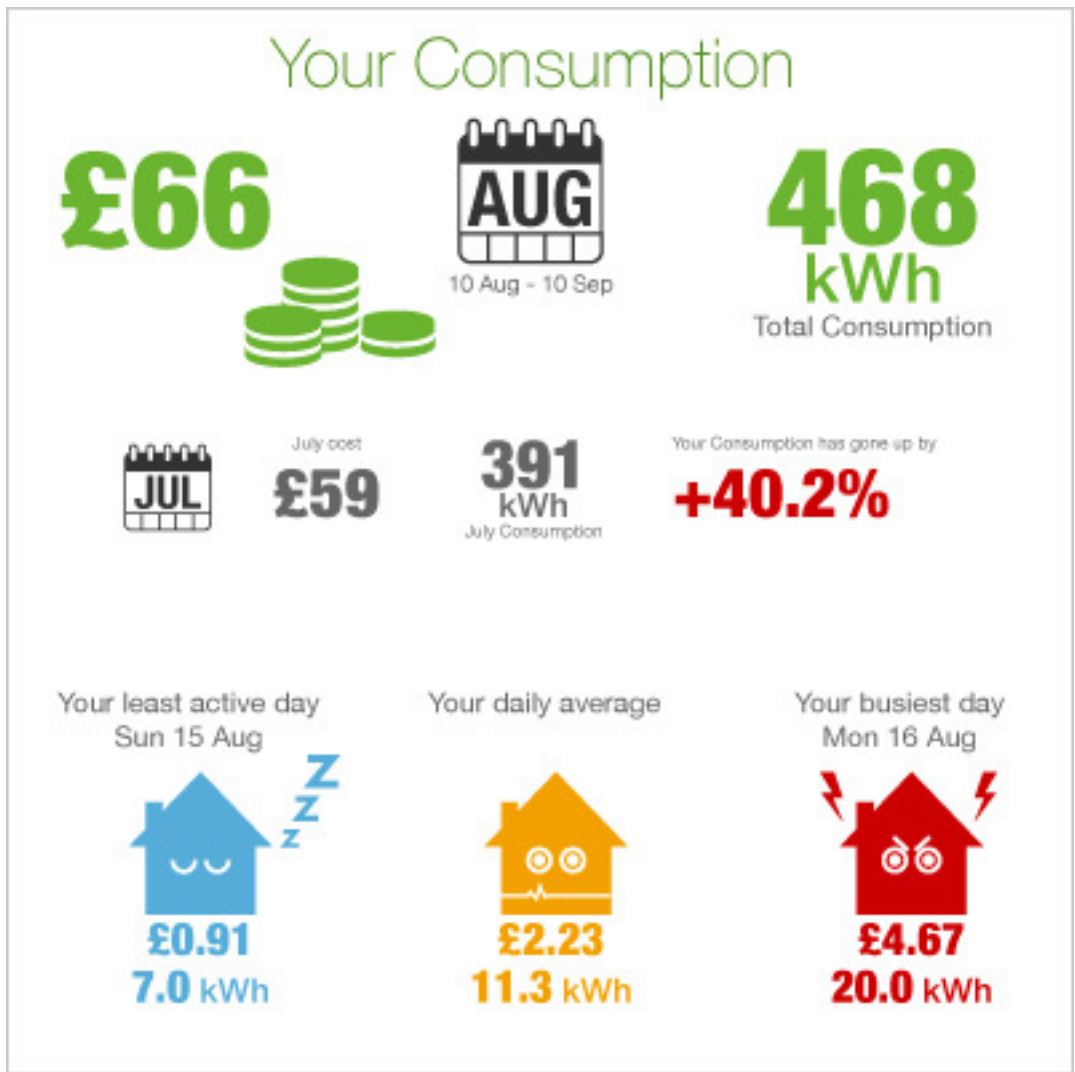

About LEDCOM International

LEDCOM International S.r.l. is a leading manufacturer of lighting control gear, lighting wireless controls and smart city applications. Its LED drivers are recognized as the top quality control gear in the market and, among other advantages, they stand out for their capability to integrate inside the same form factor wireless communication functionality at multiple frequencies without additional external boxes. Through its CellLED® project, LEDCOM is also turning the street lighting system into a pervasive next generation mobile communications infrastructure.
