

Mentioned in "Luce e Design" of September 2018 about: "Services for Smart Cities".

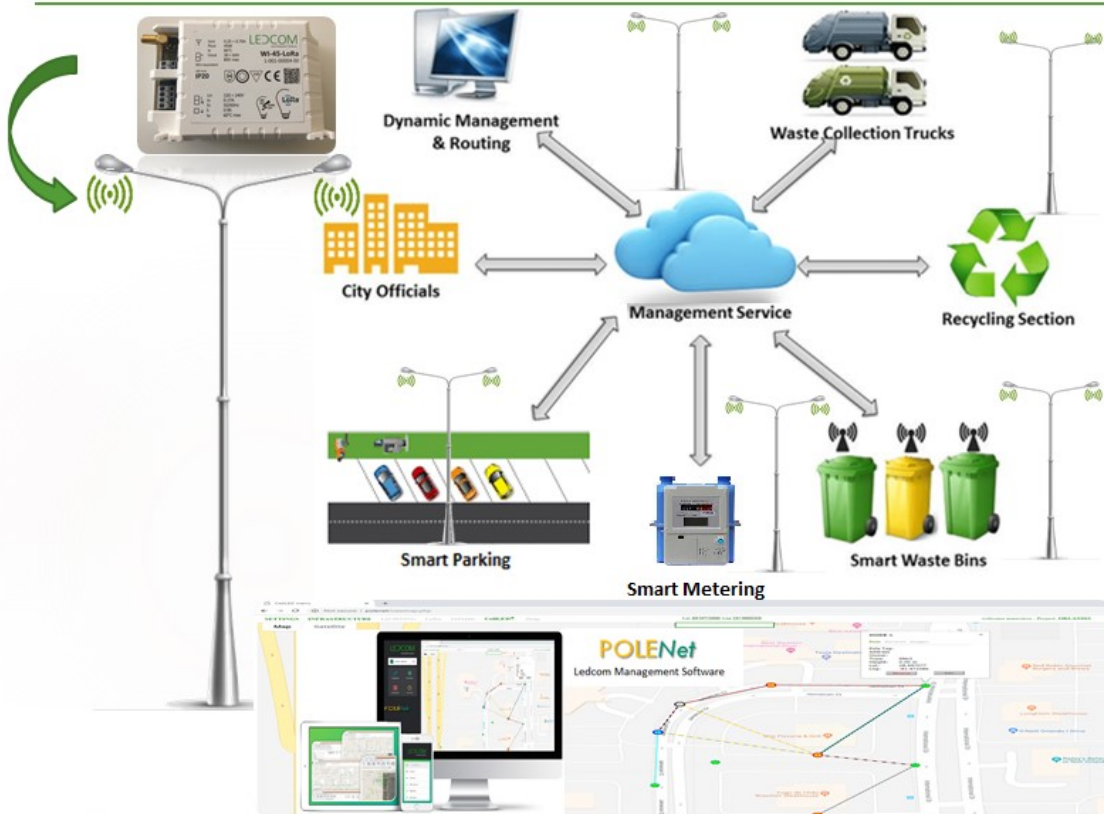

Friday November 9th, 2018

Il futuro del settore lighting sarà sempre più smart e interconnesso, basato sullo Human Centric Light e sulle applicazioni della tecnologia IoT.

La tendenza è quella di integrare nei sistemi d'illuminazione strumenti di controllo evoluti per gestire la luce da remoto, ma non soltanto: i nuovi dispositivi illuminotecnici a LED sono considerati parte di un'infrastruttura globale per la fornitura di servizi Smart che esulano dalla semplice illuminazione.

Street Lighting Energy Saving & Smart City Apps INTEGRATED

About LEDCOM International

LEDCOM International S.r.l. is a leading manufacturer of lighting control gear, lighting wireless controls and smart city applications. Its LED drivers are recognized as the top quality control gear in the market and, among other advantages, they stand out for their capability to integrate inside the same form factor wireless communication functionality at multiple frequencies without additional external boxes. Through its CellLED® project, LEDCOM is also turning the street lighting system into a pervasive next generation mobile communications infrastructure.
